

4th GENERAL ASSEMBLY INRALS well attended and shimmering with ambition

The annual General Assembly of the worldwide network of recruitment agencies in Life Sciences, www.inrals.com, was well attended and full of ambition. Two new members, Norway (www.borka.no) and England's outsourcing specialist CK Clinical (www.ckclinical.co.uk) presented themselves and showed passion to expand the success. The members celebrated the successes of the last year, shared experiences, market knowledge and best practices and sharpened the future of the network. Several marketing initiatives and methods to intensify global collaborations were set up.

www.derksenderks.nl and www.vandycke-partners.com initiated the network 5 years ago because the labor market is highly internationalized and because top talent is not bound to regions. Jan Derks : 'for both candidates and companies with recruitment needs a specialized global network is a must'. Michel Vandycke continues: "The many collaborations amongst members and the global tenders that have already been realized are the best proof of this statement". Want to know more about this growing network of over 150 specialized recruitment specialists in Life Sciences: visit www.inrals.com
